**Subject: Macquarie Builders**

Oral Health Services Tasmania (OHST) has recently undertaken a significant redevelopment of the Southern Dental Centre and the builders chosen for this important and challenging project were Macquarie Builders

This was a major project for OHST and involved a consolidation of the different areas of the building to create one integrated dental health centre with increased capacity to provide dental services in Southern Tasmania.

The building work itself was trouble free throughout due to the excellent communication between client, architect and the Macquarie Builders project foreman. The whole team at Macquarie Builders has been professional, approachable and solution focussed and has delivered a superior product on time.

Oral Health Services Tasmania has been particularly impressed with the quality of the workmanship. The attention to detail is evident throughout and we have been extremely pleased with the quality of the carpentry, set out and the finishes. This project was particularly difficult as OHST continued to operate as a dental clinic throughout the building work, which meant the builders had to work around OHST staff and patients. The building team was industrious, professional and courteous and were led by an outstanding and approachable foreman.

The strong working relationship with Macquarie Builders has produced a dental health centre that OHST is proud of and is the envy of other Public Health Services and private practices around Australia.

OHST highly recommends Macquarie Builders for future projects.

Regards,  
Gail White  
Area Manager South  
Oral Health Services Tasmania.
